ROSE EXOSOME CATALOGUE

## ROSE EXOSOME

The rose has been a symbol of womanhood for centuries: embodying beauty, strength, and healing. Avicenna, the ancient physician, valued the rose not only for its fragrance but also for its healing properties, using it to treat skin problems. The rose is also associated with Venus, the goddess of love and femininity, and its scent, along with the rose itself, subtly awakens self-acceptance, harmony, and inner radiance within us.

## EXOSOMES

**Exosomes** are tiny, nano-sized 'messenger bubbles' released by cells to transmit information and bioactive substances—such as proteins, antioxidants, and growth factors—to other cells. Their cosmetic effects are complex: they can stimulate regeneration, reduce inflammation, and provide antioxidant protection. Exosomes not only revitalize skin cells and deliver active ingredients directly to where they are needed, but they also help reduce the signs of skin aging—because healthy skin = beautiful skin.

## INNOVASTEMCELL ROSA DAMASCENA® - NATURE AND BIOTECHNOLOGY FOR TIMELESS BEAUTY

Damask Rose Stem Cell Extract, in synergy with peptides, polysaccharides, and exosomes, is an exceptionally effective skin care solution. It has powerful anti-inflammatory and antioxidant properties, while lightening pigmentation spots, brightening the skin, and evening out skin tone. Supported by exosomes, it promotes cell regeneration, enhances hydration, protects the skin from environmental stress, and helps maintain the balance of the skin's microbiome.

## BAOLIFT™ - WORKOUT FOR YOUR SKIN WITHOUT MUSCLE WORK

The unique active ingredient derived from the baobab tree's stem cells and exosomes, obtained through biotechnological methods, activates the skin's natural strengthening mechanisms, enhances muscle tone, supports the tightening of facial contours, and reduces under-eye bags. It stimulates exerkine molecules (eATP, MOTS-c, IGF-1) that are released during physical activity – a workout for the skin, without the internal muscle effort.

**ROSE EXOSOME**  
SLOW-AGING MASSAGE MASK | 100 ML

A freshly prepared, spectacular gel mask that turns the treatment into a true sensory experience. When the contents of the sachet are mixed with water, a soft, rose petal-containing gel texture is formed before the beautician's eyes, which simultaneously hydrates, soothes and brightens the skin. The combination of aloe vera and rose petal extract provides intensive refreshment, while pomegranate and a stable vitamin C derivative provide antioxidant protection against oxidative stress. The added prebiotic supports the skin's natural microbiome balance, and the active ingredients result in a more even skin tone and a fresher, smoother appearance. It has a delicately fruity scent.

A nourishing mask rich in plant oils and butters with a silky texture, designed for professional slow aging treatments. Used as a cream mask, it regenerates and deeply hydrates the skin. It is ideal for ultrasonic and massage techniques, providing lifting benefits. The stem cells and exosomes of the Damask rose soothe and protect the skin on a cellular level, while the baobab stem cell extract supports the firmness of the facial contours. The intoxicating fragrance and luxurious texture elevate the overall treatment experience to a new level.

**ROSE EXOSOME**  
LA VIE EN ROSE SORBET MASK

### ROSE EXOSOME

SLOW-AGING LIGHT CREAM  
FOR NORMAL AND COMBINATION SKIN | 50 ML

Rich in lipid complexes, this silky, ceramide-rich, fragrance-free cream provides intense comfort for dry, very dry, and sensitive skin. It is an ideal choice for nighttime care for normal or combination skin, especially for those over 45, when the skin's regenerative ability naturally slows down. The stem cells and exosomes of the Damask rose effectively reduce irritation and inflammation, while providing antioxidant protection against environmental stressors. The Baolift™ stem cell extract supports skin firmness at a cellular level and improves facial contours – for plump, soft, and renewed skin. Fragrance- and colorant-free formula.

A lightweight, fragrance-free cream that specifically targets the first signs of aging. The Baolift™ stem cell extract stimulates the processes responsible for skin firmness while toning the facial contours – for visibly firmer, more defined skin. The stem cells and exosomes of the Damask rose soothe irritated skin on a cellular level, reduce inflammation, and provide antioxidant protection against environmental effects. Its formula, rich in ceramides, supports the skin's natural barrier, making it not only look younger but also function healthier. Fragrance- and colorant-free formula.

### ROSE EXOSOME

SLOW-AGING RICH CREAM  
FOR DRY SKIN | 50 ML

**ROSE EXOSOME**  
SLOW-AGING SERUM | 30 ML

The rose petal scented mist envelops its wearer in a feminine, airy aura, while the stem cells, exosomes and moisturizing ingredients of the Damask rose help to maintain the skin's freshness and comfort. Sprayed on the face, body or hair, it refreshes at any time of the day. In a salon environment, it creates a relaxed atmosphere at the beginning of the treatment, helping to tune in and relax. It does not contain allergenic fragrances.

Multi-level support to preserve the skin's youthfulness. The active ingredients derived from the stem cells and exosomes of the Damask rose soothe sensitive, irritated skin at a cellular level, reduce inflammation, and stimulate natural regeneration processes. The baobab stem cell extract results in firmer, more contoured facial features, while visibly reducing under-eye puffiness. Its silky-light texture absorbs quickly – the perfect choice for all skin types.

**ROSE EXOSOME**  
ROSE AURA BODY MIST | 50 ML

SO11303

**ROSE EXOSOME**  
SLOW-AGING LINE FILLER CREAM | 15 ML

Immediate and long-lasting wrinkle filling for fine lines around the eyes and mouth. Hyaluronic acid microspheres bind water in the deeper layers of the skin, lifting wrinkles, especially in the mimic zones – the result is smoother, firmer skin after the first use. The clinically proven effect is prolonged and can be gradually built up. The Baolift™ active ingredient stimulates the skin at the cellular level, tones and reduces swelling under the eyes. Extracts from Damask rose stem cells and exosomes provide antioxidant protection and support skin regeneration – thus offering not only a spectacular but also a scientifically proven solution to slow down the aging of sensitive areas. Perfume and colorant-free formula.
