## REVERSE

*„Time shapes us quietly.*

*It takes – yet it also gives.*

*The only question is how we learn*

*to live in harmony with it.”*

---

*Reverse | meaning: to turn back, to redirect, to restore  
a different direction*

*We cannot stop time – but we can influence how our  
skin responds to it. We have the power to guide these  
responses toward regeneration, resilience, and time-  
less beauty.*

### CENTELLA EXOSOMES

Centella stem cell extract is rich in exosome-associated peptides and supports comprehensive improvement of overall skin tone and texture. Its regenerative performance is driven by unique plant-derived growth factors and exosome technology, helping to soften the appearance of wrinkles and surface roughness while visibly reducing redness and the appearance of enlarged pores.

### CAVIAR EXTRACT

Rich in amino acids, peptides, antioxidants, lipids, and minerals, this active complex supports skin hydration, stimulates cellular renewal, and improves elasticity. When combined with antioxidants, it helps boost collagen production, reduce inflammation, and visibly firm and smooth mature skin.

### DUAL PDRN (SALMON&VEGAN)

PDRN (Polydeoxyribonucleotide) is a highly purified DNA-fragment-based active ingredient, originally used in regenerative medicine and now applied in advanced skincare. It supports the repair of compromised epidermal tissue, helps reduce the activity of inflammatory mediators, and enhances the skin's moisture-binding capacity. As a result, skin firmness, elasticity, and overall texture can visibly improve.

### SPONGILLA SPICULES

Sterilized, size-graded silica structures derived from the skeletal framework of freshwater sponges. These microneedles create temporary micro-channels in the skin to support active delivery, then are naturally shed during the skin's renewal process. They are not absorbed into the skin. Rather than acting as active ingredients, they function as biological response-triggering tools.

SKIN COMFORT  
SERUM | 30 ML

SO30521

Fragrance-free regenerating serum designed to deliver intensive hydration and targeted skin renewal. Its lightweight yet nutrient-rich formula helps restore skin comfort while visibly improving smoothness and vitality.

The valuable nutrients of caviar extract, the deep-hydrating effect of hyaluronic acid, and the balanced blend of NMF components work in synergy to replenish, smooth, and refresh tired, mature skin. The complexion appears plumper, more elastic, and revitalized, while the serum supports regenerative processes and helps reduce visible signs of environmental stress.

Its texture also makes it ideal for saturating compressed sheet masks.

Colorant- and fragrance-free firming gel developed to care for, refresh, and revitalize the delicate eye area with targeted precision. Its lightweight, fast-absorbing texture delivers immediate comfort while visibly reducing signs of fatigue and puffiness.

Its key active is a peptide- and exosome-rich extract derived from Centella stem cells, supporting skin structure renewal and strengthening the resilience of the eye contour. Caffeine helps stimulate microcirculation and reduce swelling, while caviar extract hydrates, improves elasticity, and revitalizes the skin. With regular use, the eye area appears firmer and smoother, and the formation of expression lines is visibly delayed.

DE-PUFF  
EYE CONTOUR GEL | 15 ML

SO11503

NOURISHING ALL-DAY  
CREAM | 50 ML

SO11501

A pampering, nourishing, and intensively hydrating face cream developed specifically for the unique needs of mature skin. Its rich formula combines black caviar extract with a peptide- and exosome-rich Centella stem cell extract to support structural renewal, improve firmness and elasticity, and deliver deep, lasting nourishment.

Ceramides help strengthen the skin barrier and maintain optimal moisture levels, while caviar extract provides additional replenishing care. Its refined, elegant fragrance enhances the cream's luxurious sensorial experience.

With regular use, the skin appears fuller, smoother, and more resilient, while the visible signs of aging develop more gradually.

A deeply nourishing face cream enriched with precious plant oils, developed to address the elevated needs of mature, lipid-deficient skin with targeted care. Its high lipid content delivers immediate comfort, while the refined formula absorbs smoothly without heaviness. Black caviar extract helps revitalize and strengthen the skin, while wild yam root extract supports the maintenance of natural balance and elasticity. A peptide- and exosome-rich Centella stem cell extract enhances regeneration and improves skin resilience. The synergistic blend of plant oils provides long-lasting nourishment and barrier support.

With regular use, skin feels plumper, more elastic, and silky-smooth, while dryness typically associated with mature skin is visibly reduced.

DEEP NOURISHING ALL-DAY  
CREAM | 50 ML

SO11502

**KOREAN LIQUID MICRONEEDLING  
3000 PPM AMPOULE**

SO21522

A spicule technology-based serum designed for home skincare use, formulated with microneedle-like structures derived from freshwater sponge skeletons. It brings professional microneedle-inspired technology into daily routines in a gentle yet effective format. These microstructures create temporary micro-absorption channels on the skin's surface, supporting natural renewal processes. The dual PDRN active complex helps stimulate cellular renewal, reinforce barrier function, and activate regenerative mechanisms in a targeted way. Skin appears more resilient, smoother in texture, and revitalized. Compared to professional treatments, this milder formula is safe for at-home use. A slight prickling or tingling sensation may occur, which is a normal and expected effect of spicule technology.

**KOREAN DUAL PDRN SPICULES  
SERUM 1000 PPM**

SO30522

An innovative serum ampoule developed for professional salon treatments, containing sterilized microneedle-like structures derived from the skeletal framework of freshwater sponges. These silica-based microstructures do not act as traditional active ingredients; instead, they function as biological response triggers, activating the skin's natural renewal mechanisms. The technology does not induce aggressive peeling or pronounced irritation and involves no prolonged recovery time, allowing the skin to quickly regain its comfort. The formula is further enhanced with salmon- and rose-derived PDRN actives that support regeneration, stimulate cellular renewal, and strengthen barrier function.

**RELAXING  
RITUAL**

**SO11304 | Rose Aura Body Mist**

**MAKE-UP  
REMOVAL**

**SO10120 | Micellar Face & Make-Up Remover**

**CLEANSING**

**SO10911 | Aloe Vera Intensive Cleansing Foam**

**PEELING**

**SO21200 | Pro Fine Enzyme Peeling Gel**

**TONER**

**SO10125 | Purifying Toner with Allantoin**

**SPICULE  
TREATMENT**

**SO21522 | Reverse Korean Spicule Ampoule  
3000 ppm**

**MASK**

**SO30521 | Reverse Comfort Serum +  
SO250020 | Compressed Sheet Mask**

**ARM &  
DÉCOLLETÉ  
MASSAGE**

**SO23011 | Olive Hydrating Beauty Oil**

**RELAX  
MASSAGE**

**SO25059 | 128 Hz Weighted Tuning Fork**

**FINISHING  
CARE**

**SO21503 | Reverse De-Puff Eye Contour Gel  
SO11302 | Rose Exosome Slow-Aging Hydrating  
Cream for Normal and Combination Skin**

**HOME CARE  
12 HOURS  
LATER**

**SO10916 | Protective Hydrating Cream SPF  
for Sensitive Skin  
SO11501 | Reverse Intensive Care All-day Cream  
SO11503 | Reverse De-Puff Eye Gel**

REVERSE REGENERATING SPONGILLA  
SPICULES TREATMENT FOR DEHYDRATED,  
SUN-DAMAGED, AGING, PIGMENTED SKIN
